

O'Maley Innovation Middle School Grade level curriculum meeting notes

GRADE: 7 **DATE:** 12/14/15 **LOCATION:** 302

PRESENT: Kim Shea, Michelle Murphy

RECORDED BY: Kim Shea

PURPOSE:

Lesson planning for introducing complex fractions.

DISCUSSION: We anticipate some slowdowns as we work on dividing fractions by fractions; they understand keep/change/flip, but reducing could get hairy. Especially if reducing results in a mixed numeral.

ACTION: We'll work with Math Intervention and homework assignments this week to reinforce the division of fractions, and simplifying them.

FOR NEXT TIME: Go over when to teach similar figures, converting decimals to fractions, and percentages. Fill out works/quirks/changes for unit rate.

STILL AHEAD: Discussion of realistic time frame for the unit post test.
